SUNDAY, JUNE 22ND, 2008

2:00 PM - 6:00 PM

“VACCINATIONS ARE A

MEDICAL INTERVENTION

“ THAT CARRIES A RISK OF INJURY OR DEATH”

National Vaccine Information Center

As of the end of 2002, the FDA's VAERS (Vaccine Adverse Effects Reporting System) contained 244,424 total reports of possible reactions to vaccines, including 99,145 emergency room visits, 5,149 life-threatening reactions, 27,925 hospitalizations, 5,775 disabilities, and 5,309 deaths. The FDA recently acknowledged that 90 percent of doctors do not report vaccine reactions so these numbers only reflect approximately 10% the damage being done.
